
ISMS 420

Audion Industrial Sealer Magneta: a compact and powerful tabletop sealer for heavy duty in stainless steel.

This professional impulse sealer is suitable for sealing almost all modern film materials (PE/PP or laminates). Thick films can be sealed due to the bi-active 5 mm heating of the sealing bars. The ISMS has been developed for heavy duty and intensive use. The sealing bars are closed by means of a light pressure on the electric foot operation after which the ISMS will produce a powerful and strong 5 mm seal, driven by the electromotor.

The digital control panel easily allows you to set the ideal sealing and cooling time. Due to the special construction of sealwire tensioners the sealwire remains optimally tight even during intensive use. This ensures an excellent and reliable 5 mm seal.

The Industrial Sealer Magneta is available in 3 sizes (420/620/1020) in stainless steel or epoxy version.

Benefits

- Bi-active sealing bars which allow you to seal almost all modern film materials
- Industrial sealwire tensioners ensure an excellent seal performance
- Activation by electrical foot operation
- Seal bars are driven by electromotor
- Magnet-closure: sealing arm remains automatically closed during sealing and cooling
- User-friendly digital operation panel for programming sealing and cooling time
- No external air pressure required

Accessories

Accessories:

- Support: Allows the machine to be used with a vertical sealing position
- Bag support: Supports heavier and / or bigger bags while the operator has both hands available to guide the bag between the seal bars

Markets

- Food packaging (ISM is also available in stainless steel)
- Medical packaging
- Parts packaging

SPECIFICATIONS

Producto	420 ISMS
Longitud de sellado	420 mm
Anchura de sellado	5 mm
Tipo de máquina	Selladora manual, Selladora de impulsos
Max. Film thickness	2 x 200 Micron
Dimensions	507 x 309 x 202 mm
Machine weight (incl. pedal)	16,9 Kg
Voltage	230V - Iph - 50/60Hz
Consumption	950 W
Modelo	De Mesa
Envoltorio	Acero Inoxidable
De corte	No
Control de pedal	Si
Tipo de film	Film laminado, Bolsas preparadas, PVC, PP (polipropileno), PE (polietileno)
Sector/aplicación	Panadería, Café y té, Departamento de bomberos, Frutas y verduras, Componentes industriales, Artículos de oficina, Embalaje y logística, Cominda animales, Tienda minorista
Tipo de envase	Bolso
Tipo de producto	Fluido, Granular, Polvo, Sólido
