

Packaging in the
FOOD industry

AUDION
Packaging Machines

Protect quality, extend shelf life, and enhance presentation

The food industry needs reliable packaging for a wide range of products. Strong seals protect against leakage and spoilage, while vacuum and MAP technologies preserve freshness, taste, and appearance. Hygienic machine designs further reduce contamination and waste, ensuring safe and efficient production.

Audion Solutions

Audion delivers innovative packaging technologies that extend shelf life, improve product safety, and boost efficiency. Our robust, easy-to-clean machines ensure consistent seals, reduce waste, and streamline workflows—helping you stay competitive in food packaging.

- **Vacuum Machines:** : Extend shelf life by removing oxygen;
- **IP65 Sealers:** Hygienic, washdown-ready designs;
- **Continuous Band Sealers:** Fast, airtight seals for high output;
- **MAP Packaging:** Preserve freshness with modified atmosphere;
- **Form Fill Seal Systems:** Automate for consistent efficiency;
- **Shrink Wrap Sealers:** Professional finish for diverse foods.

Why Choose Audion? Our packaging solutions give you the tools to protect quality, cut costs, and stay ahead in a demanding food market:

- **Hygiene:** Easy-to-clean sealers for maximum safety;
- **Freshness:** Vacuum and MAP keep products fresh longer;
- **Efficiency:** Smart automation speeds up production and lowers labor costs;
- **Reliability:** Durable machines built for long-term use;
- **Flexibility:** Broad product range with customizable options to match your needs.
