

Audion SpeedBags®

Pre-perforated bags on roll for automatic bagging machines

High-quality pre-perforated bags on roll designed for use on virtually all automatic bagging machines. Produced in our German manufacturing plant with inhouse developed converters – from standard bags to custom sizes and print.

Fast & Efficient Packaging

SpeedBags® are pre-formed bags on roll with a bottom seal and perforation between each bag. The bagging machine automatically blows the bag open for quick product insertion and sealing. This enables faster packing speeds, reduces labour, and ensures consistent results. Compatible with virtually any automatic bagger, including Audion Speedpack series.

Custom sizes & Features

- Vent holes
- Easy-open perforation
- Hang holes / euro holes for retail display
- Custom sizes
- Custom printing & branding

High Output with Perfect Consistency

Every bag on the roll is produced with the same exact dimensions, film strength and perforation quality. This gives you rock-solid reliability at full machine speed – maximum bags per hour, zero rejects and perfect results from the first to the very last bag on the roll. With SpeedBags® you unlock the full potential of your bagging line.

Wide Range of Materials

- Clear LDPE – offers strength and clarity
- Duplex (white front / clear back) – print readability
- Mailer (black inside / white outside) – e-commerce
- Antistatic film – ideal for electronics
- Printed film (multi-colour)
- Paper – for eco-friendly packaging

Produced by Audion – Your Advantage

Our German production ensures consistent quality, reliable supply and fast delivery.
