

Packaging in the **ORDERFUL FILLMENT** industry

AUDION
Packaging Machines

Accelerate fulfillment, adapt to demand, and ship sustainably

E-commerce fulfillment operations face fluctuating order volumes, mixed product sizes, and limited labour availability. Manual packing often creates extra handling steps, inconsistent packaging, and delays that slow down order flow—impacting customer satisfaction and profitability.

Audion Solutions

Audion delivers innovative packaging systems that help fulfillment teams process orders faster, with fewer manual actions and better control over packaging materials and workstation output. Our solutions integrate smoothly into existing workflows, connect directly with ERP order data, and perform reliably in both low- and high-volume environments.

- **Hybrid Baggers:** Switch easily between bags-on-roll and layflat tubing;
- **Dual Material Flexibility:** Pack with paper or plastic depending on your needs;
- **Right-Sized Packaging:** Create perfectly sized bags per order to reduce material use;
- **Inline Printing & Labelling:** ERP data printed directly on the package;
- **Compact & Mobile Designs:** Fits tight work spaces and can be repositioned quickly;
- **Automatic Discharge:** Finished orders flow directly into the shipping process.

Why Choose Audion? Our packaging solutions give you the tools to boost speed, cut costs, and stay competitive in fast-paced e-commerce environments:

- **Cost Savings:** Reduce film material by up to 30% with right-sized bags;
- **Lower Staff Needs:** One operator can replace multiple manual packing stations;
- **Short Training Time:** New staff work independently within minutes;
- **Higher Output per m²:** Increase throughput without expanding floor space;
- **Sustainability:** Right-sized packaging and flexibility to run paper or recyclable films;
- **Reliability:** Robust systems built for uninterrupted high-volume performance.
