## I61B

---

This compact single arm sealer is suitable for sealing small production quantities (max. 10/min) in shrink film. It works well with all shrink films and consistently delivers superior strength seals.

The sealer is supplied with a heat gun to shrink wrap products. The I61B is equipped with a seal/cutting wire, which seals and cuts the material in one operation.

The sealer offers a very flexible low-budget solution for your small production quantities and requires less space than other shrink wrap solutions. This makes this machine ideal for use in stores, shops, offices and other environments where space is limited.

## SPECIFICATIONS

Product	I6I B
Seal length	430 mm
Seal width	0,7 mm
Type of machine	Shrink sealer
Model	Table
Covering	Epoxy
Machine dimensions	60 cm x 46 cm x 21 cm
Weight	14 kg
Pedal operated	No
Voltage	230V-lph-50Hz
Power consumption	200 W
Type of film	PVC, PO (Polyolefin), PE (Polyethylene)
Thickness of film	PE=150, PO=25, PVC=30
Type of package	Bag
Branche/Application	Bakery, Fruit & Vegetables, Industrial Parts, Office Supplies, Packaging & Logistics, Shop
Type of product	Solid
