# 300 TTS HEAT SEALER

---

The TT-sealers are pedal operated machines, controlled either mechanically (TTS model) or pneumatically (TTCD model). This leaves both hands free for packing.

The profiled sealing bars are constantly heated and the sealing temperature is adjustable. The TTCD-model is equipped with timer and digital temperature control.

Using pre-made bags the TT sealers can be used for sealing Paper and Aluminium laminates. This machine is perfectly fit for packaging coffee in laminated pouches (see video). The temperature of the jaws can be adjusted up to 200 °C to suit the type and thickness of the material to be sealed.

Both sealing bars are heated providing efficient heat distribution. As it is equipped with a digital temperature control unit, the 300 TTCD may also be used for sealing Cellophane and Polypropylene.

**Applications:** all kinds of heat sealable bags, food products, coffee, tea, seeds, ironware, mechanical and electric parts, etc.

## SPECIFICATIONS

Product	300 TTS
Seal length	300 mm
Seal width	10 mm
Type of machine	Heat sealer
Model	Table/Floor
Covering	Epoxy
Knife	No
Pedal operated	Yes
Type of film	Cellophane, Laminate, Ready Made Bags, PVC
Thickness of film	2 x 200 micron
Type of package	Bag
Branche/Application	Bakery, Coffee & Tea, Industrial Parts, Office Supplies, Pet Food, Shop
Type of product	Fluid, Granulate, Powder, Solid
