

D666 – OUTLET

The D 666 MPCV is our advanced medical rotary sealers for sealing and coding medical sterilization pouches. This sealer is developed to seal pouches according to DIN 58953 Part 7 and is suitable for packing sterilized products according to ISO 11607 and EN 868. Using a multi-line seal, self correcting seal pressure and an in-feed speed of 10m/min., the D 666 MPCV can be used for closing paper/polypropylene, medical pouches or thin aluminium laminate pillow bags (max. 100 micron, no gusset bags).

The built-in matrix printer can be used to print: date, operator name, serial number and codes, directly on the pouches according to the most recent tracking standards (EN 980 symbols). The D 666 MPCV can be programmed through the keypad, but can also be connected to a PC/network to be programmed. D 666 MPCV can be used for validatable processes through constant monitoring of all seal parameters and alarm / block functions when a parameter is out of range
