
POWER SEALER PLUS I020

Powerful validatable impulse sealer for ultimate product safety

The Audion Power Sealer PLUS I020 guarantees a high quality package result for food and non-food products. This validatable tabletop impulse sealer, standard equipped with the user-friendly Audion Touch Techware, is suitable for sealing flexible films. Up to 50 seal parameter recipes can be stored so that the operator always has the ideal pre-set settings available for each product/package.

Due to the heavy-duty construction and the high performance seal bars, thick and/or special films are sealed effortlessly with a reliable 8mm seal.

With the PLUS – series you're assured of optimal seal integrity: maximum control of the seal parameters, even with intensive use, making each seal 100% reliable!

- All our PLUS series impulse sealers are compatible with EN 868-5 and DIN 58953, part 7 norms. Our PLUS series impulse sealers also fully comply with the ISO 11607-2 and ISO/TS 16775
- Additional accessories and configurable options are available to meet the packaging requirements of every specific industry and optimize your packaging process
- *Our Power Sealer PLUS series are also available with a vacuum system, see our Vacuum Power Sealer PLUS series for more information*

Standard features

- User-friendly Audion Touch Techware (Touchscreen with Audion software)
- Compact industrial design
- Sealing length up to I020 mm
- Large sealing bar opening: 45 mm
- Bi-active sealing bars
- Emergency stop button
- Foot operation

Benefits

- Can be used in validated processes
- Ability to store up to 50 recipes on the Audion Touch Techware, ensuring that the correct seal settings are always at hand
- Possibility to add required options, configuring the best fit machine for your packaging requirements/process
- Bi-active sealing bars which make the machine suitable for laminates and thick pouches
- Pneumatic closure of the sealing bars for a powerful equally divided pressure, guaranteeing a perfect seal over the entire length of your bag
- When combined with a support, the machine can be used in horizontal and vertical sealing position and is infinitely adjustable in height

Accessories

- Worktable – Supports the bag during sealing process
- Support – Manual height adjustment and horizontal/vertical machine angle possible
- Motorized support – Electric height adjustment and horizontal/vertical machine angle possible
- Bag support
- Motorized bag support – Electric height adjustment of bag support (additional on motorized support)

Options

- Calibration options – Calibration certificate by Audion or by an accredited laboratory
- Cutting options – Manually by cutting device (knife) or automatically by cutting wire
- Cleanroom solutions – silicone poor, ESD, external exhaust for used compressed air
- Printer / labeler option

- IQ/OQ – IQ/OQ check certificate and operation and maintenance training by audion service employee

Markets

- Food industry
- Industrial Parts
- Cleanroom environment
- Medical / Laboratory industry
- Pharmaceutical industry

SPECIFICATIONS

Product	Power Sealer PLUS I020
Seal length	I020 mm
Seal width	8 mm
Type of machine	Impulse sealer
Model	Table/Floor
Covering	Stainless Steel
Knife	No (knife optional)
Pedal operated	Yes
Type of film	PE (Polyethylene), Aluminum Laminated Bags
Required air pressure connection	∅ 6 Bar
Machine dimensions	III5 x 257 x 508 mm
Thickness of film	2 x 200 micron
Branche/Application	Food, Industrial Parts, Medical & Laboratory, Pharmaceutical Industry, Medical Industry
Type of product	Fluid, Granulate, Powder, Solid
