

# SPEEDPACK HIGH SPEED MEDICAL/PHARMACEUTICAL

---

*Bag making, labelling and bag filling at high speed, meeting strict requirements of medical and pharmaceutical industry!*

The powerful high speed Speedpack Medical produces bags from lay flat tubing for packaging medical disposables and so optimizing the medical packaging process.

This solution is equipped with a label printer and constructed from stainless steel, applicable for installation in cleanrooms. The sealing process is fully validatable, guaranteeing full safety and a reliable 8 mm impulse seal at approx. 10 bags per minute.

#### Medical packaging solutions

- Stainless steel cover
- Clean air inlet and exhaust
- Special knife for perforating sterilisable film
- Validatable sealing system
- 8 mm impulse seal
- Airpress system for taking air from bags (cleanroom approved)

#### Extra packaging solutions

- (Label) printer and extra mounting plate for high speed version
- Product support discharge conveyor
- Side guidance for connecting conveyors
- Cover touchscreen
